General Comment

I absolutely believe we should be pushing hard against this, there is already so much shady and illegal scraping of the hard work of creatives and various craftsmen, authors, artists and musicians who rely on the internet to share their work. AI is a useless heap, a soulless cash grab and throws creative people under the bus while amplifying scams and falsehoods. Not only does it have no place in the government or anywhere else for that matter, but its current application is genuinely a detriment to society. I'd like for us all to be able to trust our own eyes and ears for the foreseeable future, this is not okay.
