General Comment

Generative AI is an immensely dangerous technology that will do nothing if not ruin the creative industry and threaten the integrity of the internet as a whole. We are already seeing an obscene flood of misinformation and abuse of GenAI technology to steal the work of creatives and impersonate people both living and dead across the web, and any efforts to continue expanding on what this technology can do will only compound the issue further. The use of AI outside of greatly restricted scientific application is irresponsible and can only do far more harm than good.
