Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2124

Comment on FR Doc # 2025-02305

Submitter Information

Name: Miles Cockerham

General Comment

Generative AI (LLMs, Image Generators, et al.) as it currently exists, is a money pit. A waste of computational power that serves no greater purpose other than adding errors and overhead to any field where it is implemented. This is not to mention the moral implications of the wholesale theft of intellectual property, that is used to run and continually feed these models. So that they can continue to churn out useless slop that nobody wants. That said, any 'Action Plan' regarding AI should be one that seeks to protect rights holders and creatives first and foremost. No generation without proper compensation. If AI Companies cannot continue to exist while properly paying for the works they use, then they do not deserve to exist.
