General Comment

Why are we reducing great minds and amazing skill to training fodder? Should we not instead be rising above what is a glorified algorithm and instead funding and fueling the next generation of creatives? If our leaders fear China pulling ahead in AI training models so much that they're willing to gut and betray entire industries and millions of individuals, why not beef up our own material security and ensure that our rights don't get swallowed up by foreign AND domestic forces?

It's sad, pathetic, and cowardly that the US is even considering something as shameful as catering to 1-2 companies over the voices and rights of millions.
