General Comment

I dont believe ai has any place in the future of america as it is predatory against artists and will be, and has been, used to blindly discriminate against human beings by the government already. It gets rid of people making decisions and creating in order for soulless robots to do it. This is dangerous and anyone who cant see that is intentionally being ignorant for money. Itll be used for evil, mark my words.

Do you want your name to be associated with evil in the future ? Do you not care about your legacy as people? You cannot give in to facism, and ai will be one of the many building blocks to the facist agenda run by the most powerful people in the world right now in order to treat people without humanity for power and money. Dont bend the knee to evil, grow a spine people.

You KNOW that ai will put people out of work in order for millionares to make more money without hiring people who could do the job. Theres already been articles written about the state department using ai to revoke the visas of students who appear "pro-hamas" which is HORRIFYING for many reasons. theyre searching their social media accounts which is such an abuse of power, you KNOW these "pro hamas " supporters probably are just PRO PALESTINE and ANTI GENOCIDE.

You can not be complacent with this insanity. America should be firmly against ai, which will be the downfall of humanity. Dont take my word for it, take Steven Hawking's. "Hawking cautioned against an extreme form of AI, in which thinking machines would “take off” on their own, modifying themselves and independently designing and building ever more capable systems".

We are already too late in our fight against Ai to put an end to it before it gets large, but ai must be stopped. It needs to be heavily regulated to keep human beings at the forefront of humanity. Exploitative Deep fakes are being made of innocent people, artists are being put out of jobs, ai is being used to blindly discriminate against people, and it WILL be the downfall of america. Dont let this happen to us.
