General Comment

AI art is built on the theft of the time, experience, and effort of humans. Yes, I wish I could tap a few keys and see on screen the images in my imagination. But I have no legal or moral right to the work of someone else and they have no legal or moral right to mine.

Also, without human eyes reviewing output, mistakes creep in. That's not too worrisome with images, but what about AI-written textbooks? Or AI-written software applications? There is a significant difference between "Let's eat, Grandma" and "Let's eat Grandma" but both are grammatically correct sentences. It does not have to be a major error to be a significant error.

Furthermore, I want robots to do my dishes and clean my house so I can write books, not write books and leave me to clean my house!
