General Comment

Current copyright protections are vital to prevent theft and essential copying by so-called A.I. systems that would just copy the work of writers, artists, programmers, and designers without paying for that work. It would choke our media, culture, digital competition, and business innovation. Businesses that depend on copyright—major employers across the country—would have mass firings and undermine the economy as a whole while progress would grind to a crawl. Softening copyright would destroy the economy from within.
