General Comment

There is no ethical use of generative AI.

Generative AI does not create original content.

Generative AI cannot and will not replace human creatives.

Following through with this plan would be unethical, unfair, and unnecessary. It would hurt and devalue human creators. It is an attempt to legalize theft.

Artists, authors, and content creators will be harmed. The proposed plan shows the administration's blatant disregard for the livelihood of these people.

Again. There is no ethical use of generative AI.
