General Comment

The 'AI' (Large Language Models) these companies are trying to sell us isn't 'intelligent'. It's a chatbot that, at best, can summarize things accurately about half the time. At worst it's used by police and government to 'identify' and terrorize innocent people. These LLMs have very little place in a government of the People, by the People, and for the People. We have tried and tested computer technologies that we've been using for decades, that don't purposefully lie to us. And when these legacy systems do fail we can audit the code to find out why.
