General Comment

Speaking out for myself and other creatives: AI is the worst. AI programs are the equivalent of a demo or Alpha level program. They don't work! If they really worked, human input and correction would be minimal. Instead, it's increased workloads. Not only that, the only thing AI can do well is steal data. That's all it does is steal and smash all that info together badly.

AI is anti-American! It is anti-freedom! If a company has to steal to make money they are nothing but fraudsters, scammers, and charlatans! They steal what was made by the hands of real, living, breathing Americans, and sell it back with their own name on it. Lazy is what I call it. These AI companies don't want to work like the rest of us! If we cannot make a living off our own labor, without machines stealing what we've made, this country is not a free country.
