General Comment

We do not want AI to run our government. It is a fine technology and like all useful tech it will grow and evolve in spite of efforts to regulate it. However, that does not mean we should simply remove all roadblocks and checkpoints. We are a nation for the people, by the people. Nowhere there does it say that we should offload decision-making, manual review, and listening directly to the people onto unfinished language models and generative AI.

This solution is lazy, malicious, and undeserved by the American people. Our leaders should be ashamed but they've already proven incapable of that.
