

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-iw4f-ipv
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2206

Comment on FR Doc # 2025-02305

Submitter Information

Name: Richard Fay

[REDACTED]

General Comment

I am a freelance visual artist, small businessman, and American citizen. I am also an individual who takes pride in being aware of various environmental issues and consider myself something of an environmentalist. As an artist/small businessman, I have sold my cover artworks and interior illustrations to various small-press publications, in the United States and abroad. I have sold and continue to sell print-on-demand merchandise featuring my original artworks through various platforms, and oftentimes do so internationally. As an artist, businessman, environmentalist, and American, I am deeply concerned about the unregulated development and deployment of AI. I am concerned about AI-art generators being trained on art created by human artists and the potential copyright infringements of said training and image generation. I am worried that the current government, in its haste to sustain and enhance America's AI dominance and to compete with other nations in the development of AI, is neglecting the flourishing and competitiveness of human artists and potentially ignoring long-standing legal protections afforded to the creations of said human artists. Furthermore, as an environmentalist, I am also concerned about the environmental harm (including excessive use of power and water) of AI. I worry what pressures unregulated and unrestricted development and deployment of AI will put on an already stressed planet and how those pressures will negatively affect the flourishing of various humans here in America and worldwide.
