General Comment

Gen AI is a waste of money and we shouldn't be using tax dollars to fund it. It would not work if they hadn't stolen millions of works from the internet and the creators refuse to pay the people they are profiting on. It's the biggest scam of this century. It's a magic 8 ball that produces results that may be right some of the time. The fact that the government t wants to implement it into our system is a huge security risk. We need more AI regulations so it can stop being forced down consumers' throats when the technology is less than useless as it is.
