General Comment

AI should be used computationally and academically not to generate writing and art. AI needs to be regulated or you risk diluting our culture and the voices of artists both visually and literary. AI is a great tool for calculating numbers but has been shown again and again that it is not to be trusted with facts and images (see the story of the AI saying that triangles have four sides and the fact that my phone calls a table a dog). Regulate AI use or it will open up lawsuits and create unsafe situations.
