## General Comment

I am an upcoming artist, and i am going to keep things simple. AI has been rapidly affecting my community and its misuse has caused many artists who do this for a living trouble. Not only is this AI art taking jobs from artists themselves, but it's also used to steal people's ideas, as it learns from art all over the internet. When AI is trained by these different art pieces, it is most of the time not crediting these artworks. When a human does it, it's plagiarism. But when a robot does it that's being USED by a HUMAN, it's okay? It's not morally right and it's not ethical. This regulation needs to be put in place to stop AI artists from stealing artwork from others and make them to do everything properly like everyone else.
