Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2254

Comment on FR Doc # 2025-02305

Submitter Information

Name: May C

General Comment

AI is a waste of time and energy. For the severe cost of running it, you receive mediocre results at best. The cost in resources is insane. It invalidates the working relationships of all artists and creative teams. The gold rush chase of "easy money is a fools idea.

All training "resources" used for AI are people's hard work. It's theft. If you use a product you should have to pay for it, that's how business works. If someone wanted to use YOUR work to train a machine to do YOUR job, you wouldn't want that, would you?

Art and all creative pursuits have a soul, even if said piece of work is poor quality. The fact someone took the time to learn and try of their own volition is what is so powerful.

AI has none of that. There's no joy in creation. Just means to generate "content". Not the noble goal of creation.
