General Comment

AI needs to be seriously regulated so that it cannot use other's information without consent. Giving AI companies free rein to use whatever information or data they want without restriction endangers us all. In an age where our data is so easily obtained and abused by those in power and other scammers, I do not want to see my data, my intellectual property, my art, or anything associated with me be put up for grabs for anyone who wants it, to do whatever they want with it. I feel that it violates my rights to privacy and it violates my rights to ownership over my own information and property like my photos and my art.
