General Comment

I do not believe AI has any place in the future of the United States' or the world's success. If we are to be concerned about the amount of money being spent by the US government on inefficient or wasteful ventures, then it would be prudent to avoid investing in AI. It is extremely expensive, proven to be ineffective at accomplishing its very simple goals, and a much smaller amount of money could be spent on something more immediately beneficial to everyone's lives--such as infrastructure.
