General Comment

This is a dangerous blanket wide infringement on copyright holders and artist's protected works! If an artist or copyright holder want to offer to train their AI, they can do it on their own prerogative. This would allow tech companies to blatantly plagiarize hard works of artist and writers and even endanger their livelihoods.

This should not go through! Generative AI in its current form is impractical! It's a giant carbon footprint hole and no amount of nuclear power plants can fill it without more perilous workarounds! Using AI to plagiarize creative and written works is a bad use of generative AI! It's prone to hallucinations that could mislead the public! This is all just another means to lock end users into using services of the oligarchy (e.g. Google, Microsoft, etc.). Protect the rights of creators instead!
