

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-k1hx-3ufp
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2302
Comment on FR Doc # 2025-02305

Submitter Information

Name: Tyler Bouchard

[REDACTED]

General Comment

Why are we as people, corporations, businesses, etc beholden to copyright if AI will not be? Surely just looking at what this has done to search engines and the internet in general so far is obvious. Stolen content warped beyond recognition with all proceeds going to the one who stole it. Images made up to stir anger. Images made to stir up confusion.

We are wasting resources we don't have. Energy we can't spare. Employment we can't risk losing all in the name of a technology that hasn't even proved itself. Quite the opposite. The technology has proven multiple times that it hallucinates information it does not have. Spreads false information based on these hallucinations. Spreads falsities as true (27F water doesn't freeze example is widespread in google. How in the world are we pushing for such protection for such an inadequate technology? It's been "waiting to get better" for years now. It hasn't. It has gotten worse.)

We do not need to give this technology more power when it cannot utilize what it has. It needs to be reigned in or we're going to lose far more than we gain.

For the love of all things precious to this country stop giving this technology that has proven itself a detriment more. If you're going to make it beholden to none, then we should be beholden to none as individuals. If you can't do this, then this technology should not have any boons.
