General Comment

Our February 2025 sales declined 49.15% compared to 2024, thanks in large part to Google's AI Overviews significantly reducing our website traffic. As a manufacturer, we don't consider this winning and at this rate we will be lucky to be in business in 2026. Unlike Chegg, which has sued Google, most small manufacturers and publishers don't have the financial resources to file lawsuits and nor should we. Government has the responsibility to ensure free markets exist and thrive, but unfortunately AI Overviews puts everyone doing business online at risk of permanent closure. Who is winning now, besides Google? Amazon, Walmart and the other marketplaces known to peddle Chinese goods with ads on Google.

To win the AI race, AI Overviews must be removed from search so that we American manufacturers aren't quarantined off from consumers. If we fail to take action on AI Overviews now, the result will be more American manufacturers eliminated which would make the country even more reliant on China for the finished goods Americans consume.

As it pertains to AI companies having the Government's permission to scrape copyrighted works, there could be benefits only if it were used in a closed system and not used publicly to destroy entire industries like AI Overviews is doing. Regardless, any policy negotiated should also demand the removal of AI Overviews from search since its use has already inflicted irreversible economic damage on many industries. We must also be mindful of where the need for data ends. For example, to cure diseases do we as a society give AI access to all American patient medical records? These are tough questions to ask, and there must be limits put in place that are core to our American values which include privacy, the right to prosper and receive the financial benefits from our hard work.

Please strive for balance in creating an action plan, because right now AI Overviews is threatening every other type of business trying to be a productive participant in an information driven society. Thank you for reading my comments, and have a good day.
