General Comment

This will harm Americans. AI is a worthless fad and it is not the American people's responsibility to tolerate the erosion of our rights just because tech companies want to force us to integrate their underperforming toys into everything. Tech companies need to be held to the same standard as everyone else. This stuff creates soulless slop that gives everything a skeezy and cheap reputation. Tools like this only ever get used to replace living, hard-working, REAL PEOPLE with real talent and drive. There is zero value in sustaining a "dominance" in a field that the majority of people already find distasteful, disreputable, and harmful. Can we please live in a world where we don't sacrifice the average American's rights just because massive corporations are worried that their golden product isn't making them any money because it takes so many resources to create a machine that performs on par with your average 7th grader with access to an actual search engine like DuckDuckGo
