General Comment

Any “unhampered” and “unimpeded” development of “AI” is nothing more than indiscriminate theft of human work. “Garbage in = garbage out.” “You get what you pay for.” “AI” developed indiscriminately will be actively harmful to the overwhelming majority of humans while unjustly enriching a select few. To truly make the United States of America great the government should work to nourish and support human artists and innovators and treat “AI” as just another tool—useful, but dangerous if applied incorrectly. “AI” developed from human work that was not adequately paid for is theft and should be treated (and prosecuted) as such.
