General Comment

Generative Ai currently functions by take the work of thousands without their consent or compensation and allowing Google and openai to train off of the work of thousands both violates copyright law but is also currently part of a open lawsuit. them asking to train off of others work this way is just their attempts to dodge that law suit because they know they're going to lose it and have to pay for the work they stole. Our government should not be complicit in theft and companies trying to dodge law suits.
