General Comment

Please do not go through with this. AI as we know it is not actually anything intelligent, it is merely pattern recognition and combination on a large scale, built off of works it had no rights to train on. Jobs are at stake because companies would rather use composites of stolen work than anything original thinking they can save a few bucks when in reality it only further harms their brand.

You claim this is for dominance but you cannot dominate in a field where nothing is actually original or yours. Nothing that LLMs provide is original or able to be protected.
