Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2348

Comment on FR Doc # 2025-02305

Submitter Information

Name: Max Colios

General Comment

Copyright is important for not only artists and illustrators, but marketing and businesses in general. To release copyrighted material to the private Artificial Intelligence sector is not only a violation of an individual's right to own their own creative work, but continues to allow large AI sectors to work above the law and take material from other businesses with those businesses having no recourse. I believe this gives AI sectors an unfair business advantage over any sort of company that does not have the resources to invest in large-scale AI generation and scrapers. This can enforce current tech monopolies and is unhealthy not only for the individual citizen but for businesses in general.
