General Comment

Please DO NOT allow generative AI companies to train their data on copyrighted work. At their CEOs' own admission (see CEO of OpenAI in particular), these generative AI systems cannot function without STOLEN work, taken WITHOUT PERMISSION and WITHOUT COMPENSATION. This is in blatant violation of numerous copyright laws and we CANNOT give them a pass. Generative AI is also proven to be a massive burden on energy grids and has disastrous effects on our already worsening climate problems.

We are already in a recession with inflation at an unbearable high - axing copyright protections for creatives will make these much, much worse. If the moral imperative of NOT allowing generative AI companies to train off of STOLEN AND COPYRIGHTED material is somehow not compelling enough, and if the catastrophic effects generative AI has on global climate struggles is somehow not compelling enough, then at least the disastrous economic consequences that would follow should be sufficient enough to maintain copyright laws and NOT give generative AI companies a pass despite established laws that dictate otherwise.

In summary, DO NOT allow generative AI companies to train their data from copyrighted, stolen material. I myself am an independent artist and have had my entire livelihood put at risk by the rampant theft of these generative AI companies. Please enforce copyright laws and protect the creative industry, as it is both morally and economically what MUST be done, otherwise things will get even worse than they already are for EVERYONE.
