General Comment

I am a private artist and am very concerned about tech companies attempt to gut my copyright protections for the content I create. As described, the action plan will not only override the protections for myself and artists like me, but even the companies who want to use AI to their own ends. So long as the justification is 'for training generative AI' no art or information will be considered sacred.

I am additionally concerned about the environmental consequences of the use of AI. The amount of power needed to power the computational processes of AI is substantial, including carbon emissions and water usage.
