General Comment

AI is an insult to creatives everywhere, and by extension an insult to regularly folks whose own personal data and pictures are being used to train these machines. AI is nothing more than a short cut and not even a good one, it was created with the wrong ideas in mind and allowing AI to continue to exist in the way it currently does will leave a precedent for copyright infringement to be the norm, without being able to enforce it, costing people and companies a large amount of money, affecting their profits harshly.
