

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-lblp-zaz3
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2389
Comment on FR Doc # 2025-02305

Submitter Information

Name: Tessa Huddleston
Address: United States,

General Comment

If America decides to prioritize the use of unlicensed work as training data for these big AI tech firms, it risks losing the very thing that makes it unique and profitable. If working artists are unable to contribute meaningfully and make a living, there will no longer be incentive for the creation of one of America's biggest exports: entertainment of all kinds (music, movies, video games, books, etc.). Generative AI is largely proving to be unprofitable and far too expensive to maintain at the rate these companies want. In the end, everyone loses out if companies are able to skirt that law and destroy other industries and livelihoods in the process. These big businesses are racing to the bottom for a technology that is largely useless to most people. They put on flashy displays, but in the last three years generative AI hasn't really revolutionized any business. If anything, it has muddied things for many people, often making things more complicated than need be by adding an automated element that doesn't work well and frustrates more than helps.

If America wants to keep its competitive edge, it needs to uphold copyright so that working people can maintain their livelihoods and continue to contribute to society. Don't allow these tech firms to con the public with impossible promises while CEOs line their pockets with the money that should have gone to working people.
