General Comment

We need to keep our copyright and privacy protections in place. If AI has to break the law and steal in order to grow it shouldn't be allowed to exist in the first place. Generative AI creates nothing of value. It is soulless, incredibly harmful to the environment, and does nothing but steal and give nothing back. It is an excuse to cut jobs from hardworking humans and give them to a computer that does not think for itself, and regularly spews out false information. Do NOT give this win to Big Tech.
