

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-lkij-f4bq
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2403

Comment on FR Doc # 2025-02305

Submitter Information

Name: Shlomo Katz

Email: [REDACTED]

General Comment

Leading AI experts, such as Nobel Prize winner Geoffrey Hinton and Turing Award winner Yoshua Bengio, estimate a 20-50% chance that continued AI development will lead to the extinction of humanity, as AI models far smarter than humans pursue their own goals and view human interference as an obstacle to those goals. This is an unacceptable risk, vastly higher than the risk of human extinction from nuclear war or any other cause. Therefore, please prioritize preventing human extinction over all other priorities. Thank you.
