As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-lpuz-wujs
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2414

Comment on FR Doc # 2025-02305

Submitter Information

Name: M Montana

General Comment

AI is debilitating for every form of employment - in addition to the more obvious entities that can be replaced by AI, such as artists, creatives, and lower-level employees, managerial positions are also liable to be replaced by AI upon further advancement - from a business perspective, why would you employ someone to review an AI's work when you can just have the AI double-check its work?

AI, at this stage, will not be the answer to any problems Americans currently face. It cannot efficiently process information compared to humans, and is currently prone to hallucinating false data points and developing biases based on user expectation. I strongly suggest avoiding implementation until significant safeguards are in place.
