General Comment

I firmly believe as an American citizen that AI generation as it currently stands is detrimental to the public. AI should not do the heavy lifting that takes away our personal growth. AI should be enhancing our decisions like a tool should, instead of giving us an out to pass off responsibility and effort. Unethically sourced AI is also unsettling in ways that undermine craftsmanship in digital matters. Who can use the full benefits of AI generation is also a troubling matter as it has massive potential for misuse as its life-like quality continues to increase, there are worries such as generating alternate history or falsified evidence/ defamation or use in scams.
