Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2426

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

This must not pass, as it will lead nefarious and untrustworthy actors being able to legally steal US copyrighted material from important rightsholders. Many of these US copyrighted materials are used to protect national security. Pivotal historical endeavors in Hollywood will be violated as a result of this if it passes, and the value of them will drop like a rock as the profitability of rereleasing them or revisiting them vanishes. Millions of corporations across America will be devastated and lose the ability to obtain profit. It will also lead to the US being a weaker power in AI, as US models will be less capable of generating new original designs and content due to pollution from copywritten material that would be usable by the generated result. If this passes, it will lead to the US corporations and citizens being harmed more than helped.
