

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-lvb5-bayr
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2428

Comment on FR Doc # 2025-02305

Submitter Information

Name: Martha Saltz

Email: [REDACTED]

General Comment

AI in its current state is theft. There is no argument about it. It takes information, images, and writings from real people, jumbles it all together, and produces something it claims that it created itself. When in reality you're seeing a collage of people's work that they weren't paid for and that they don't even realize has been used to program this AI. It doesn't "learn" anything that it hasn't stolen from a real person. If AI companies were to ask permission to use people's work to program their AI, then that would be fine. But instead, they take what they want without asking and play the victims when they get confronted with their actions. If your business can't operate without theft, then your business shouldn't exist at all! And the government shouldn't be allowing these companies to persist or even have any part in the government!
