

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-lvju-1o40
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2430

Comment on FR Doc # 2025-02305

Submitter Information

Name: Beth Zyglowicz

Email: [REDACTED]

General Comment

I used to work for a licensing agency. Under currently copyright law, in order to use an image, the rights holder of that image must be compensated. This use can be as brief as showing the image on screen for a documentary, or as extensive as creating varied merchandise. But unless the image is in public domain or within fair use boundaries, it is NOT free to use. It MUST be paid for. AI makers have scraped millions of copyrighted works to feed into their models. This is a blatant violation of copyright and must not stand. There is no reason why AI programmers should get to ignore current copyright law and regulations when they stand to profit enormously from the software these stolen works are based on.

Copyright law exists to encourage innovation by allowing creators to be fairly compensated for their intellectual property. Making an exception for AI training models will stifle innovation, not promote it.
