General Comment

Having AI completely free to train on things they don't even own will just lead to a mess for all creative works. It will be much harder to ascertain what is truly made by our fellow people. People will lose out on jobs because the AI will simply replace them. This is only going to make things far worse for all the people in the creative field. Many people who sell their art in any location will have to compete with people who don't even share any passion in this field. They will have to compete with people who are just aiming to rip people off. Also our way to learn with art will perish as a result too. We need to stop the AI from ruining the one thing we as people can do freely and that is self expression. Do not push AI further please.
