General Comment

AI in its current form is nothing more than stolen works from various forms of media, online, print, images, artwork, etc. removing ethical guardrails creates a dangerous precedent and opens the door for nefarious foreign actors or enemy governments to create misinformation.

Doing so would result in confused voters at the local level, also contribute to a mass "Dumbing down" of childhood test scores, early data is already showing kids in K-12 schools..both public and private...have an over reliance on Gemini, ChatGPT, among others, I worry that this would create a snowball effect 5, 10, 20 years from now when many of these students will be in the workforce and become taxpayers.
