Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2453

Comment on FR Doc # 2025-02305

Submitter Information

Name: Joseph
Sweetser

General Comment

I am writing in to comment on my disapproval of this plan for removing restrictions set in place on the development of AI. AI needs proper restrictions in place in order to prevent misinformation being even more widespread through the use of it. In an age where it is increasingly becoming difficult to separate truth from fiction, loosening restrictions placed on AI will allow companies to generate images or videos of fictitious events to sway the public into believing their political biases.

This bill also threatens the livelihoods of anyone who relies on ownership of their ideas through copyright. Writers, artists, filmmakers, photographers, and many other people would have their creations scraped by AI with no say of their own, allowing AI companies to profit off the hard work of countless individuals.
