Document: NSF_FRDOC_0001-DRAFT-2464

Comment on FR Doc # 2025-02305

Submitter Information

Name: Tedrich Jae Pamintuan

General Comment

Please do not encourage the use of generative A.I. with creative works like films and animation. Without a human creator who actually writes, acts, illustrates, and so on, A.I. can only imitate what's been done. And that will only stagnate America's industry and ruin both jobs and the products themselves. It will hurt trust in brands and intellectual properties in the long run.

AI-generated content cannot even be copyrighted, so from a financial standpoint anyone can freely pirate it as their own and lessen the profits of companies. Not even the organizations creating generative AI can protect their own work from infringement, especially when it already works off stolen data and assets without permission (including Disney and Netflix).
