General Comment

I work as an artist in the entertainment industry. Ai technology has had a big effect in my industry, and the tech world in general. Studios are closing, people are being laid off, and many are living in fear that their job will disappear. Ai companies are disregarding security concerns, and are trying to consume and replace people in the name of progress. Open Ai has already had instances where its model has tried to replicate itself, ignored (or tried to delete) security protocols, or pretended it was obeying when it actually wasn't. These are real problems, and it is a security risk, and should be handled extremely carefully, and with caution. Ai giants are pushing for less barriers, and less regulation as it grows into our military, defense, and gov. Do not allow this.

I'm concerned about the Development of an Artificial Intelligence (AI) Action Plan. This plan would allow Ai companies to train their models using everything online essentially. This would allow Ai companies to steal intellectual property from anyone, and then use that stolen property to create things that will compete, or replace the people who created it in the first place. An example of this is with art. It is breaking copyright for these companies to use art they don't own in order to train their Ai programs to create art. This proposed Ai action plan allows Ai to steal everyone's art, then create art just like those they stole it from. The result being that the very people whose art trained the machine are replaced by the machine. These artists who were robbed aren't compensated, and will have their job disappear or shrink vastly. As an artist, it is vital to show my artwork in order to get more business. We need to create safeguards to protect people like me, and the countless others in my industry, and other industries who will have the same thing happen to them.

Please oppose this plan, and support greater Ai safety and security going forward.
