General Comment

I believe AI to be something of a public wrong that steals from individuals for the profit of big corporations that feeds us misinformation and poorer products. taking jobs from the individual for the sake of a worse America where less jobs and worse consumer goods is not what we should be prioritizing, this would benefit a select few while harming masses as a whole. we are already encouraged to think less by big AI companies that attempt to feed us thoughts from a machine that does not think for itself, we will be less educated, less creative, and less protected by AI and its controllers.
