As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-msay-vmn9
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2494

Comment on FR Doc # 2025-02305

Submitter Information

Name: Brandon Lee

General Comment

AI should not be excluded from any form of copyright in it's sourcing of training material. Its inclusion in various forms of production, design, and art in general only serves to hurt an already extremely competitive market. Hiring engineers, designers, and artists to create material for AI to train off of could open more job opportunities for citizens nationwide. Allowing them to bypass copyright however would miss this opportunity, and instead allow companies to steal the work of artists and cut out those roles entirely. This could mean less jobs, a worse overall economy, and a far lower standard of products across the board through over-reliance on the AI already evident in advertisement and various forms of media.
