

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-mzde-pjnv
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2508

Comment on FR Doc # 2025-02305

Submitter Information

Name: Julie Meridian

General Comment

What could possibly be critical to American interests that would merit further disincentivizing individuals from creating new, original work? That's what the proposal from OpenAI and Google would do: open the door even more for those business to exploit creatives.

Current copyright legislation protects creative works made by people. It is simply not true that using creative works to train AI — without their creator's consent — is a form of Fair Use, regardless of where they are posted publicly. PUBLICLY VIEWABLE IS NOT LICENSE FOR FREE USE.

The AI built from them generates lookalikes that are competing with the original creators. This is currently cutting into the (already meager) living of working creatives, and I am hearing how about how it is dissuading the next generation from pursuing creative work (and for some, moving them into a state of mental health crisis).

Please keep a shred of decency about the value of human-created works and stop this erosion of copyright. It won't make the U.S. safer, but it will reduce our creative strength.
