General Comment

Please do not allow for unethical training of AI. Many methods of gathering the vast amount of required training data are deceptive, unethical, or a straight infringement of personal privacy and human rights, often ignoring intellectual property or copyright laws. To prevent this, I believe it is paramount that we prioritize transparency on AI training data and protections for people's personal data.

I also believe that replacement of human workers with AI poses a grave threat to lower and middle class people, as well as being extremely dangerous as companies opt to use subpar AI that has not been properly tested for safety and accuracy in order to save money.
