General Comment

AI has no benefit for the future of America, it is nothing more than a smokescreen designed to steal from people and maximize shareholder profits. People must be protected from this blatant plagiarism algorithm, and the American government should prioritize the individual liberty of its people over the greed of the corporate drive behind this new tech scam. Our artists and engineers are already poor and hungry, caving to the demands of these technological tyrants will only lead to death. Already AI is being used for unambiguously evil purposes, it must be legislated, regulated, and Americans must be protected. The future of America with AI at its side is nothing more than the future of a landfill in the place where our once great nation stood.
