General Comment

Generative AI is ruining the economy and will take jobs from so many people. I am one of those people who has lost income, security, and my employment because there was no AI oversight and my company thought it good enough to use gen AI to replace my work. This is not the American dream, this is not what machines are supposed to do for people. Let's use AI that isn't trained on unpaid work to do the chores people don't want to do, cleaning and laundry and garbage disposal, so that all people can be more productive, more creative, and live happier lives.
