

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-n8ly-ubx3
Comments Due: March 15, 2025
Submission Type: Web

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-2534

Comment on FR Doc # 2025-02305

Submitter Information

Name: Avery

Fristratedartist

General Comment

Use of generative AI of any purpose violates Americans' rights to their own intellectual property, especially those in creative fields. These programs are written with the sole purpose of stealing copyrighted images, as well as audio and video files, in order to use them (without consent) to train a computer to unlawfully replicate the stolen materials on demand.

Intellectual property and copyright laws aside, the use of generative AI will NEVER offer new or imaginative creation. It can only jumble up what has been fed into its algorithms and spit out a lower quality replication. Machine replication will NEVER compare to genuine human creation and it should not be touted as a way toward a 'brighter future' when it directly opposes intellectual property/copyright laws and jobs in creative fields. Generative AI will displace millions of people from their jobs and thrust corporate creative industries as a whole into a tailspin of financial losses because it will only be able to achieve vague mechanical garbage devoid of passion and true creativity. The only way to a brighter future is to divest from generative AI and invest in your HUMAN CITIZENS, pay artists for their work!
