General Comment

AI, generative AI, and LLMs do nothing for the world and america, or anyone for that matter. They are simply tools to steal other's works and destroy creativity and thought by mixing other's things into a slurry of similar images and language. At best it's used to make images and text that can be used to trick people, at worst it does trick people and cause harm through scammers, con artists, and anyone holding any form of artistic license or copyright. Generative AI in any form is a net negative for everyone and should not be supported in any way, shape, or form.
